3. This will initiate the download of a printable pdf report that shows the selected sample compared to the assigned baseline (if any) and the historical trend of samples from the same equipment.
4. If you select multiple samples, each new sample will begin on a new page.
5. In addition to the printable .pdf view and the dashboard grid web view, the results can be downloaded in an excel table format.
6. To do this, use the search box to narrow the selection of samples shown in the grid, and then click the Excel button in the action bar to export all samples shown in an Excel format.
